Wisdom-focused School Initiatives

FAITH ✶ WISDOM ✶ SERVICE

Deer Lake School [BC]

As a *Leader In Me/7Habits of Highly Effective People* school, their first semester schoolwide "Wildly Important Goal" was for each student and staff member to set a personal WIG for growth. From goals like improving math scores to reading a book a week, each member of DLS set a goal, made a scoreboard to track their progress, and found an accountability partner to keep them encouraged. What a great plan to grow in wisdom!

Crawford Adventist Ac East [ON]

A highlight at Crawford Academy East was the transformation of the school foyer to commemorate education leaders and local black Adventist history makers for Black History month in 2019. A joint effort of students and staff, this project provided important co-curricular learning.

Peace Christian School (BC)

The Board and faculty at Peace Christian School, in northern BC, provided a unique opportunity for the school to partner with researchers across western Canada to explore the viability of Haskap berries, a new crop to Canada, and give students some hands-on agricultural experience.
